Doosan Infracore
Construction Equipment

SOLAR140LCV

Engine Power : DIN 6271,net 71kw(96ps)@1,850 rpm
SAE J 1349,net 71kw(95HP)@1,850 rpm
Operational Weight : 13,900kg (30,600 lb)
Bucket capacity(PCSA) : 0.28 ~ 0.76m³(0.37 ~ 0.99 cu.yd)

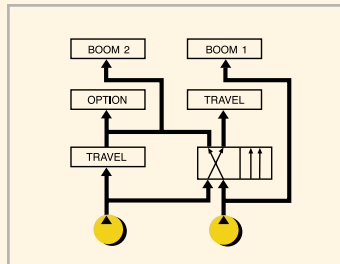

Performance

This hydraulic excavator is equipped with the air-to-air intercooler engine, which has the greatest power output in its class and excellent fuel economy. It assures outstanding workability, productivity, and efficiency through the e-EPOS system, the new and improved version of EPOS System. This will assure increase in operating capacity and decrease in fuel consumption.

Improved maneuverability and control

New technologically advanced control valve and joystick valves have been installed to allow speedy, smooth and responsive control.

Advanced hydraulic circuit separates the oil flow for travel and boom function to allow precise and safe operation when handling loads during travel.

The circuits for the boom, arm, and bucket have been improved to assure smooth and confident control during combination.

Air to Water Intercooler Engine

Greatest power output and high-efficiency engine in its class.

Environment friendly, Green engine.

This machine is equipped with the engine meeting the U.S. EPA Tier-II Regulations and European stage-II Regulations requiring the reduction of harmful NOx, PM, HC, and CO emissions.

Compatible with the European New Noise Control Requirements

Joystick grip with 2 switches

Spare switches are installed on both joystick grips to control the additional attachment.

Excellent Reliability

Doosan's world-class center for product reliability performs sophisticated testing on all completed products, to ensure they meet or exceed market standards.

Improved swing mechanism. (Equipped with anti-rebound valve)

Swing anti-rebound valve is installed as standard equipment, which allows the operator to stop the upper structure at the desired position. As a result, operating efficiency has been greatly improved.

Emergency throttle cable

In the event of engine speed control dial malfunction, emergency throttle cable mounted in the cabin can be used to manually control engine speed.

Working Environment

Wide operator cabin space meet the ISO Standards and expanded all-round visibility. The low-noise, low-vibration type comfortable cabin provides the operator with safe and ergonomic operating environment.

Good visibility

The enlarged right-hand glass and the minimized crosswise strut in windshield have been achieved to increase the visual range by 15% when compared to the previous machine.

Increased foot space

Instruments, controls, and accessories have been ergonomically located in the cabin and 300mm seat slide has been achieved to provide ample space for operator's feet and legs.

Long wind shield wiper blade

Front visibility is further improved by using the lengthened wiper blade (wiper area increased 35% compared to previous machine.)

Large ceiling cover

The ceiling cover can be opened to confirm the bucket operation even at the maximum excavating height. (Visual range increased by 25% compared to previous machine.)

Cup holder

A folding style cup holder has been installed in the cabin allowing the operator to easily store a can or cup.

12V Spare Power Socket

This socket can be used for charging a cellular phone or powering a small 12V DC electrical device.

Fresh Air Type Air Conditioner

One touch selector switch for the air conditioner and heater output, featuring a multi-vent circulation system that allows for greater cooling / heating performance. Improved front window defroster system has been added to provide enhanced clarity and visibility during any working condition.

- Easy replaceable air filter.
- Larger cool air intake vents.
- Industry standard fresh air/recirculation control system incorporated.
- Modular electric fan condenser compartment.

Low Vibration Cab Mounting System

By using a total isolating seal design (full sealing) outside noise has been drastically reduced to the levels comparable to that in a modern car. A viscous sealed mounting system has been incorporated, and the frame, cabin and seat have been designed to absorb major and minor vibrations, resulting in a significant decrease in vibration felt by the operator.

Maintenance

Quick and easy service checks, maximizing the excavator's life expectancy.

PC monitoring function (SMS)

By connecting a laptop PC to the controller (e-EPOS controller) of the machine, data such as pump pressure and engine RPM can be displayed graphically. Also other various machine status data can be stored in memory and printed out using a printer.

Electrical control access box

Pull-out style drawer for electrical control access box allows for easy service and maintenance.

Engine oil drain valve

The engine oil drain valve with quick coupler provides fast and environmentally sound serviceability.

Water separator

The transparent glass water separator is mounted at a location easily accessible from the ground allowing easy maintenance of the fuel system.

Graphic display LCD Monitor panel

The information monitor panel displays both text and symbols for easy recognition of machine status and various other data

Simplified operation mode selection

The 3 work modes from the previous models have been reduced to digging and trenching modes for easy selection.

- Digging Mode :

General Excavating, Ground Leveling, Loading Dump Truck, allows for versatility.

- Trenching Mode :

trenching or excavating of side wall, operations which require heavy swing work.

Real-time machine data display

Displays 23 different machine status data and information such as pump delivery pressure and engine RPM.

Technical Data

Engine

Model	DOOSAN DB58TIS
Type	Water-cooled, 4-cycle, direct injection .
Aspiration	Turbocharged Air-to-Water intercooled
No. of cylinders	6
Rated flywheel horse power	
DIN 6271, net	71KW (96PS) at 1,850rpm
DIN 6271,Gross	74 KW (100PS) at 1,850rpm
SAEJ1349,net	71KW (95HP) at 1,850rpm
SAEJ1349,Gross	74 KW (99HP) at 1,850rpm
Piston displacement	5,785cc (353cu.in)
Maximum torque	40kgf.m (392Nm, 290 lbf.ft) @1,850rpm
Bore and stroke	102mm × 118mm (4.0" × 4.6")
Starting system	24V Electric motor
Batteries	2 × 12 V × 100AH

Hydraulic system

e-EPOS (Electronic Power Optimizing System) allows the operator to maximize work efficiency over a full range of operating conditions and to minimize fuel consumption.

- Hydraulic system assures fully independent and combined operations.
- Automatic 2 speed travel system for high traction force and travel speed.
- Cross-sensing and fuel saving pump system.
- Auto idle system.
- 2-Working /2-power mode selection system.
- Computer aided engine-pump control.

Main pumps	2 variable displacement axial piston pumps.
Max. oil flow	2 × 116 ℓ/min (2 × 30.7 US gpm, 2 × 26 Imp gpm)
Pilot pump	Gear pump
Max. oil flow	27.7 ℓ/min (7.3US gpm, 6.1 Imp gpm)
Swing motor	
Relief valve	265bar (3,840psi, 270 kgf/cm ²)

Main relief valves

Boom/Arm/Bucket	Normal : 324bar (4,690psi, 330kgf/cm ²) Power Boost : 343bar (4,980 psi, 350kgf/cm ²)
Travel circuit	324bar (4,690psi, 330kgf/cm ²)

Hydraulic cylinders

High-strength piston rods and tubes are used. Cylinder cushion mechanism is provided for all cylinders to assure shock-free operation and extend life of cylinder.

Cylinders	Q'ty	Bore × Rod dia. × Stroke
Boom		100 × 70 × 1,080mm (4.0 " × 2.8" × 42.5")
Arm		115 × 80 × 1,085mm (4.5 " × 3.1" × 42.7")
Bucket		95 × 65 × 1,365mm (3.8 " × 2.6" × 53.7")

Super-structure revolving frame

A deep, full-reinforced box section. Heavy-gauge steel plates used for ruggedness.

Operator's cab

A roomy, independent, shock and noise-free operator's cab, 4 side safety glass windows give all-round visibility. Front window slides up and stores in the roof and side window can be opened for ventilation. Fully adjustable suspension seat. Air conditioner. ISO standard cab.

Noise Levels (dynamic value)

LWA External noise	
Guaranteed Sound Power Level	103dB (A) (2000/14/ EC)
Measured Sound Power Level	101dB (A) (2000/14/ EC)
LpA Operator noise	74dB (A) (HIGH IDLE)

Controls. 2 implement levers

Pilot pressure control type. Right lever is boom and bucket control, left lever for swing and arm control.

2 Travel pedals with levers

Pilot pressure control type. Independent drive at each track allows counter-rotation of the tracks. Levers are detachable.

Swing mechanism

High-torque, axial piston motor with planetary reduction gear bathed in oil. Swing circle is singlerow, shear type ball bearing with induction-hardened internal gear. Internal gear and pinion gear immersed in lubricant. Swing parking brake is spring-set, hydraulic-released disc type.

- **Swing speed** 0 to 12 rpm(min⁻¹)
- **Rear swing radius** 2,200mm (7'2")

Drive

Each track is driven by an independent, high-torque, axial piston motor through planetary reduction gear. Two levers or foot pedal control provide smooth travel or counter-rotation upon demand.

Travel speed (High/Low) 4.9/ 3.4km/h
(3.1/ 2.1mph)

Maximum traction force 12,570kgf (27,710lbf)

Gradeability 35° (70%) continuous

Undercarriage

Tractor type undercarriage. Heavy-duty track frame, all welded stress-relieved structure. Top grade materials are used for toughness. Side frames are welded, securely and rigidly, to the track frame. Lifetime-lubricated track rollers, idlers and sprockets with floating seals. Track shoes of induction-hardened rolled alloy with triple grousers. Specially heart-treated connecting pins. Hydraulic track adjusters with shock-absorbing recoil springs.

Buckets

Standard & Optional Equipment

SOLAR 140LCV

Standard equipment

Hydraulic system

- Boom and arm flow regeneration
- Boom and arm holding valves
- Swing anti-rebound valves
- Spare ports (valve)
- One-touch power boost

Cabin & Interior

- Viscous cab mounts
- All weather sound suppressed type cab
- Air conditioner
- Adjustable suspension seat with head rest and adjustable arm rest
- Pull-up type front window and removable lower front window
- Room light
- Intermittent windshield wiper
- Cigarette lighter and ashtray
- Cup holder
- Hot & cool box
- Graphic display monitor
- Fuel control dial
- AM/FM Radio and cassette player
- Remote radio ON/OFF switch
- 12V spare power socket
- Serial communication port for laptop PC interface
- Joystick lever with 2 switches

Safety

- Large handrails and step
- Punched metal anti-slip plates
- Seat belt
- Hydraulic safety lock lever
- Safety glass
- Hammer for emergency escape
- Right and left rearview mirrors
- 360 degree fan guard

Others

- Double element air cleaner
- Pre-cleaner
- Water separator
- Dust screen for radiator
- Engine overheat prevention system
- Engine restart prevention system
- Self-diagnostic system
- Alternator (24V, 60 amps)
- Electric horn
- Halogen working lights (frame mounted 2, boom mounted 2)
- Hydraulic track adjuster
- Track guards

Optional equipment

Safety

- Boom and arm hose rupture protection valve
- Overload warning device
- Cabin Top/Front guard (ISO 10262, FOGS standard)
- Travel alarm
- Travel & swing alarm
- Rotating beacon

Cabin & Interior

- Sunvisor
- Sun roof
- Joystick lever with 3 switches

Others

- Piping for hammer (one way)
- Piping for rotation
- Additional work lights on the cabin (① 2 front lamps, ② 4 front and 2 rear lamps)
- Large capacity alternator (24V, 80A)
- Electric fuel supply pump

Boom and arm hose rupture protection valve

Sunvisor

Additional work lights on the cabin

Electric fuel supply pump

Rotating beacon
